The Chairperson of the SLC welcomed the participating members and Special Invitees. The Chairperson requested all the members to introduce themselves. After introduction, the Chairperson explained the initiatives taken up by the Government for the benefits of the entrepreneurs.

The SLC observed that the Operational guidelines of IDP 2015-20, issued vide G.O.Ms.No.108 Dated:14.11. 2015 of Industries and Commerce (P&I) department, dated: 14/11/2015, the Interest Subsidy is being sanctioned to various units by following two methods:

- a) In case of general Micro Small Enterprises, a minimum 3% interest per annum should be borne by the Enterprise. Over and above 3% interest per annum, reimbursement will be done to the extent of maximum 9% for a period of 5 years.
- b) In case of textiles, Interest Subsidy provided by Government after taking into account the assistance from all sources, (Centrally Sponsored TUF scheme, Industrial Policy of the state etc.) shall be capped at 12.5% per annum in a way that maximum Interest Subsidy provided by Government will be up to 8% per annum for Weaving (with or without preparatory), Dyeing & Processing, Knitting, Garment/Made-ups Machine Carpeting, Machine Embroidery, Technical Textiles and any other activities/process like crimping, texturing, twisting, winding, sizing etc. within the textile value chain and up to 7.5% for Spinning & Modern Ginning.

In few cases, where the Textile units have availed Term Loan @11.50% from the Financial Institution and 4% of Interest rebate under TUF scheme, they can avail maximum Interest subsidy @7.50 % resulting the effective interest as 0% only on Term loan utilised.

The SLC decided that the issue should brought to the notice of the Government that Micro and Small Enterprises are bearing a minimum of 3% Interest per annum and there is no such minimum rate to be borne by the Textile units.

The State Level Committee has also observed that as per para no. (5.4.7) of IIPP 2010-15, “the base annual consumption will be either average annual power consumption of previous three financial years of the Expansion/Diversification project as certified by Chartered Accountant or power consumption for **75% of installed capacity utilization of the original industrial enterprise**, whichever is higher. Power consumed over and above the base consumption will be eligible for reimbursement of power cost. If the Enterprise/Industry taken up expansion/diversification in the same year, the base power consumption will be calculated proportionately.”

Where as in the IDP 2015-20 policy, the para No. 5.6.8 indicates that “the base annual consumption will be either average annual power consumption of previous three financial years of the expansion / diversification project as certified by Chartered Accountant or power consumption for **75% of connected power load of the original Industrial Enterprise**, whichever is higher. Power consumed over and above the base consumption will be eligible for reimbursement of power cost. If the Enterprise /Industry has taken up expansion/diversification in the same year, the base power consumption will be calculated proportionately.”

The SLC observed that connected load will always more than the actual power consumed because the **connected load is calculated as the total electric power-consuming rating of all devices (as lamps or motors) connected to a distribution system** and it is being computed for 24 hours in a day and 350 days in a year (connected load in KVA X 24 hours X 350 days). Hence in all cases, the 75% of the connected load will be the maximum value which has to be fixed as base annual consumption. Therefore the committee observed that the connected load may not be taken in to consideration for fixing the base consumption.
